R E M A R K S

The preliminary amendment of the Specification and claims is respectfully requested to place the Specification and claims in a U.S. format. A clean copy of the Specification is appended for the convenience of the U.S. Patent Office.

The foregoing amendments to the Specification and claims are fully supported by the Specification and claims as filed and do not add new matter. More particularly the corrections to the Specification are matters of obvious clerical error and the additions incorporate matter in the claims as filed to prevent an objection/rejection that the Specification is required to support the claims rather than vice versa. The addition of headings are consistent with the format described in 37 C.F.R. 1.77(b) and MPEP 608.01(a).

The amendments to the claims including new claims 29-36 also do not add new matter. More particularly the amendments to claims 1-28 place the claims in a U.S. format. New claims 29-36 are based upon the Specification and drawings as filed.

It is believed all of the claims are now in a U.S. format

MARTIN ENGLER,
EDMUND FOEHR and
WALTER SCHUMACHER-RUF
Serial No.: 10/539,305

and are deemed patentable which action is respectfully requested.

Respectfully submitted,

BRENEMAN & GEORGES
